ABOUT ME

Web developer with hands-on experience building full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing responsive, user-friendly frontend interfaces alongside secure, scalable backend services and RESTful APIs. Comfortable working across the stack, from database design to UI implementation, with a strong foundation in modern web development practices. Currently pursuing an MCA to deepen technical expertise further.

PROJECTS

StockTally — Stock Trade Tracker | [Live Demo](#)

Tech Stack: React.js (CRA), Tailwind CSS, Node.js, Express.js, MongoDB (Atlas) | Vercel, Render

- Built a full-stack MERN application to track stock trades — logging buy/sell entries and closing out completed trades.
- Implemented automatic profit/loss calculation based on trade entry and exit values.
- Developed RESTful APIs with Node.js and Express.js, with trade data modelled in MongoDB Atlas.
- Designed a responsive trading dashboard with React.js and Tailwind CSS; deployed on Vercel and Render.

LeaseStay — Property Rental Platform | [Live Demo](#)

Tech Stack: React 19, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Redis | JWT, Google OAuth, Cloudinary, Razorpay | Vercel, Render

- Built a full-stack TypeScript rental marketplace with three distinct roles — tenant, property owner, and admin — each with its own dashboard, permissions, and workflows.
- Implemented secure JWT + cookie-based authentication with Google OAuth, plus a document-verification pipeline (Cloudinary uploads) for owners applying to list properties.
- Built an end-to-end property booking and payment flow using Razorpay, with real-time status tracking from request to confirmed booking.
- Engineered real-time owner and admin analytics dashboards (Recharts) covering revenue, bookings, and property status, backed by a centralized JavaScript System and Redis caching; deployed on Vercel and Render.

EDUCATION

Master of Computer Applications (MCA) Dept. of Computer Science, Gujarat University | 2025 — 2027 | **Pursuing**

Bachelor of Computer Applications (BCA) Gujarat University | **CGPA: 8.26**

Higher Secondary (12th — Commerce) | Completed: 2022 | **86.57%**

Secondary (10th Grade) | Completed: 2020 | **80.67%**

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Database: MongoDB, Mongoose

Tools & Deployment: Git, GitHub, Postman, Axios, Cloudinary, Vercel, Render

LANGUAGES

English, Hindi, Gujarati
